Sprint 03 Review

Start Time: 15:00
End Time: 15:30
Venue: MSL 004

Sprint goals:

1. Admins should be able to create events
 - Was the goal achieved? Yes.
 - What features were implemented?
 1. An admin can create an event.
 2. All facilities booked for an event are unavailable for booking by residents.
2. Notifications
 - Was the goal achieved? Yes.
 - What features were implemented?
 1. Users receive notifications about upcoming events
 2. Users receive notifications about maintenance closures
 3. Users receive notifications if their facility bookings have been approved/denied.

Features to implement in sprint 3:

- Usage trends
 - Show how much a facility is being used - i.e pie charts
 - Should only be seen by the admin
- Maintenance reports
 - Should be available for each facility over a certain period of time
 - Should be able to see status of reports - in progress/complete
- Custom view
 - Usage rate for specific facilities should be displayed

Feedback from product owner:

- Add an events calendar for better display
- Organise notifications in a more orderly manner
- Bonus feature: Add weather feature
