

9 Apr 2025 | 📅 Software Design

Attendees: Jayden Harold Tariro Muvevi Karabelo Borotho Dylan Naidoo
Karabo Bopape

Sprint 01 - Meeting 03

Venue: Wartenweiler Library Discussion Room 01
Start time: 10:00
End time: 11:00

Notes

- Based on the morning lecture, we now know that there will be no email storage in the database. Use Google ID for login verification.
- Considering two-factor verification for admins for security reasons.
- Discussed asking users to provide role type, which will then be approved by admin, but decided against it.
- Agreed to use GitHub actions for automating workflows and CI/CD processes.
- Discussed the HTML structure for the landing page
- Discussed GitHub releases and tags.
- Looked into Google tokens and the code associated with verifying them

Action items

- Jayden presented the UI mockups
- Created a prototype based on the mockup
- Dylan designed and presented an ERD for the database
- Karabo led the team to come up with User Acceptance Tests

Wartenweiler Library Booking Confirmation
