Attendees: Jayden Harold Tariro Muvevi Dylan Naidoo Karabelo Borotho
Karabo Bopape Martin Shilenge

Sprint 02 Review

Start Time: 15:00
End Time: 15:30
Venue: MSL 004

Sprint Goals:

1. Implement core functionality for user management- onboard members, revoke access, assign roles
 - Was the goal achieved? Yes.
 - What features were implemented?
 1. Onboarding of new members
 2. Admin role assignments
 3. Revoking user access
2. Booking system functionality
 - Was the goal achieved? Yes.
 - What features were implemented?
 1. Residents can book facilities for specific time slots with no double booking.
 2. Admins can approve bookings.
 3. Admins can deny bookings.

Feedback from product owner:

- It would be good to notify a user if their account has been denied, or if their booking has been denied by the admin.
- Users should not be able to book a facility for a past date.

Features to implement in sprint 3:

1. Maintenance Reporting:
 - Users should be able to report facility issues.
 - Admins should be able to assign maintenance issues to facility staff.
 - Facility staff should be able to update status of maintenance issues.
2. Events and notifications:

- Admins should be able to create events.
- Users should receive notifications about facility maintenance closures and any upcoming events.
