

5 May 2025 | 📅 Software Design Tut

Notes

- Discussed logic behind notifications
 - Added notifications page for all residents
 - Bookings - when a user's booking has approved
 - Events - when an admin makes an event, it is added to the notifications page
 - Maintenance - when an issue is reported
- Update UML Diagrams
 - Add relevant databases to class diagram
 - Further updated component diagrams

Action items

- ☒ ~~Events(Fetching & Display)~~
- ☒ ~~Create notifications~~
- ☒ ~~Add UML diagrams onto notion~~
